Abstract
Material for students in a Study Abroad course beginning in Ascea, near Velia, in Southern Italy. It begins with the geological evolution of the Mediterranean and moves on to the prehistory of the area, the coming of the Greeks, the settlement of Elea = Velia, the Eleatic philosophers, the area in Roman times, and history up to the present, with special attention to the Consorzio Velia, which provides water to the area.

Cilento is is a secret tourist destination south of the Amalfi Coast with great, clean beaches, fantastic archaeological sites like Paestum and Velia, secret caves, and great food. South of the site is the Cilento's biggest city, Agropoli, which makes for a fine base to explore the coastal villages. Just a bit further down the road is the castled hill town of Castelabate with its intriguing historic center and fine views. It was the setting of the popular movie Benvenuti al Sud, Welcome to the South. The Autostrada A3 [ autostrada map ] runs through the Vallo di Diano, the Diano valley, and runs close to some amazing sites, including the Pertosa Caves and the Certosa di Padula, the second largest Charterhouse in Italy after the one in Parma, and sports the largest The Cilento is an outstanding cultural landscape. The dramatic groups of sanctuaries and settlements along its three east–west mountain ridges vividly portray the area's historical evolution: it was a major route not only for trade, but also for cultural and political interaction during the prehistoric and medieval periods. The Cilento was also the boundary between the Greek colonies of Magna Graecia and the indigenous Etruscan and Lucanian peoples. The remains of two major cities from classical times, Paestum and Velia, are found there. Why should you visit?
